***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1, 4-10 and 16-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In view of the 35 U.S.C. 112 second paragraph rejection and interpretation provided below, claims 1, 16 and 25 recites subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. For example, claims 1 and 16 recite, "a plurality of pairs of pads that are on the substrate and together with the semiconductor blue-light emitting elements, arranged in a matrix, in such a manner that each pair of pads is adjacent to a different one of the semiconductor blue-light emitting elements in a row and column direction," however, as can be seen in Figs. 1A and 1B of applicants drawings, each of the pairs of pads (or red LEDs which are mounted on the pairs of pads) do not have a different blue LED adjacent to it. Though each of the pairs of pads have a blue LED adjacent to it, each of the pairs of pads do not have a different blue LED adjacent to it.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 4-10 and 16-27 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 16 recite, "a plurality of pairs of pads that are on the substrate and together with the semiconductor blue-light emitting elements, arranged in a matrix, in such a manner that each pair of pads is adjacent to a different one of the semiconductor blue-light emitting elements in a row and column direction," and claim 25 recites, "forming a plurality of pairs of pads on the substrate in such a manner that each pair of pads is adjacent to a different one of the semiconductor blue-light emitting elements in a row and column direction." The recitations are unclear and indefinite as to what is being claimed. It will be interpreted to be a plurality of pads are arranged on a substrate in matrix and between each of the plurality of pairs of pads, in column and row direction, is a different one of the plurality of semiconductor blue-light emitting elements.

***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
